

THE CONCEPT

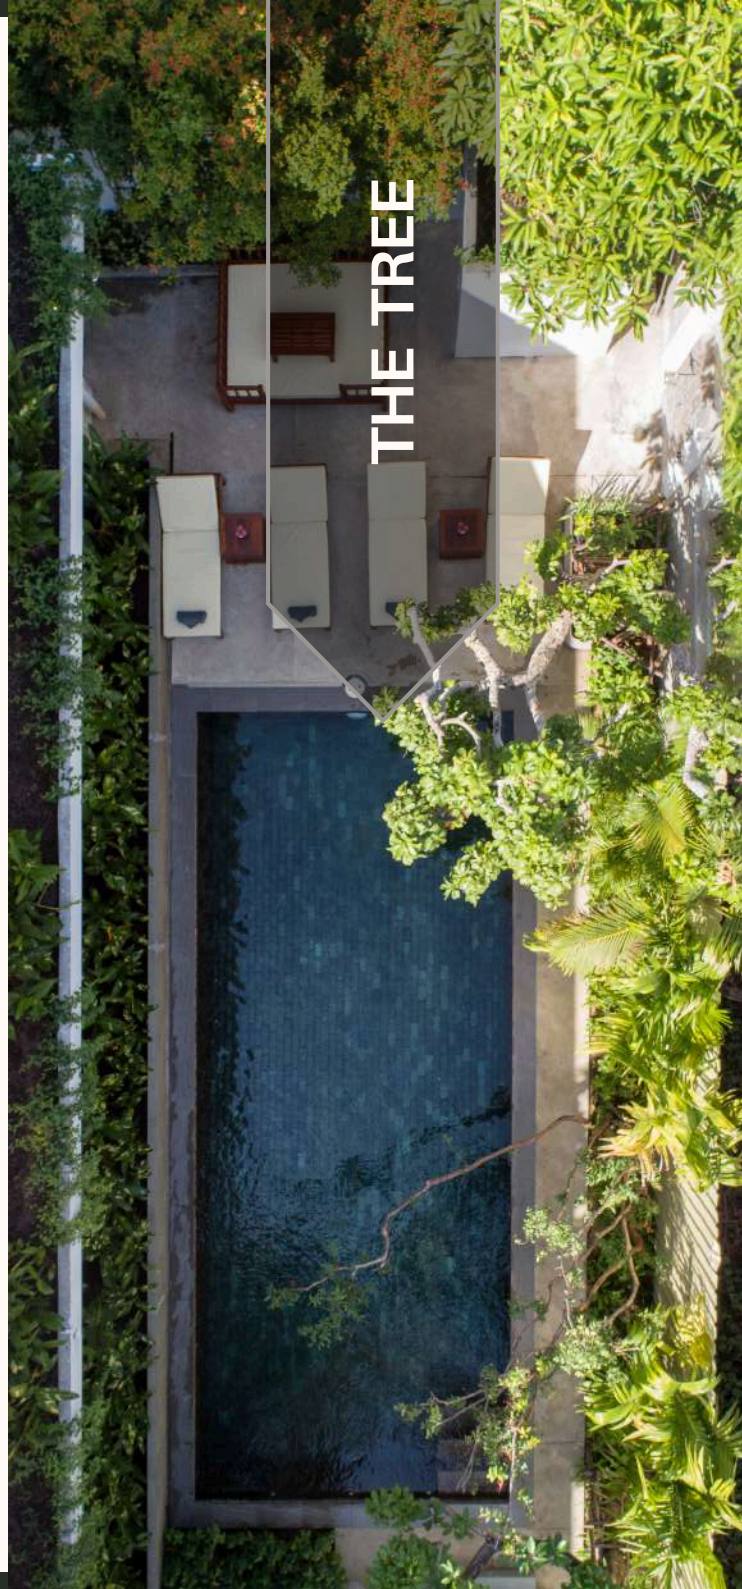

The Tree follows the signature "Eco-Chic" philosophy of the StayNature group. It is designed to feel like a sophisticated treehouse retreat, blending raw industrial elements (like polished concrete) with warm, natural materials (wood and stone). The property is characterized by its vertical greenery and open-air spaces that allow for natural ventilation and a deep connection with the surrounding flora.

Location:

It is located in a quiet, authentic Khmer neighborhood, offering a local experience while remaining close to the city's highlights:

- * **Distance:** About a 3 to 5-minute walk from Pub Street and the Old Market.
- * **Environment:** Situated away from the main tourist thoroughfares, providing a silent and restful environment after a long day at the temples.
- * **Angkor Wat:** Approximately 15-20 minutes away by vehicle.
